

HIKKY BILLING

A Subscription and Billing Intelligence

PROBLEM

Managing subscriptions, invoices, renewals, and payment records manually is often slow, error-prone, and difficult to maintain as the number of customers increases. Businesses frequently face issues such as missed renewals, inaccurate billing, and poor tracking of subscription history. HIIKKY is a smart Subscription & Billing Management System designed to simplify and automate the entire subscription lifecycle. It enables efficient plan management, automated invoice generation, renewal tracking, payment monitoring, and billing history management through a centralized platform. By reducing manual effort and improving accuracy, HIIKKY helps businesses deliver a seamless, reliable, and organized subscription experience.

TARGET USERS

BUSINESS OWNERS

USERS

SOLUTION

HIKKY provides a centralized platform to automate subscription and billing management. It allows Business Owners to create subscription plans, manage users, generate invoices, track payments, and handle renewals efficiently. Users can easily subscribe to plans, view invoices, monitor their subscription status, and access billing history. By automating these processes, HIKKY reduces manual work, minimizes billing errors, and ensures a smooth and reliable subscription experience.

TECH STACK

BUSINESS OWNERS FEATURES

MODULE	FEATURES
